

Sabarmati hub to offer seamless connectivity

TIMES NEWS NETWORK

Ahmedabad: The high-speed rail multimodal hub in Sabarmati will offer seamless connectivity between transport modes, including Sabarmati railway stations, the metro station, the upcoming bullet train station, and the bus rapid transport system (BRTS).

As an essential component of the Mumbai-Ahmedabad high-speed rail corridor, the hub's facade showcases a striking stainless steel mural depicting the historic Dandi March, highlighting Sabarmati's significance in India's history. The hub in-

corporates three foot overbridges (FOBs). The longest FOB, measuring 249m, links the hub building to the bullet train station and Sabarmati railway station. The second foot overbridge, spanning 215 m, connects the hub to the

metro station and BRTS stand, while the third FOB, measuring 230m, provides a

direct link between the bullet train station and Sabarmati railway station.

The third floor of the hub building features a concourse area that offers various amenities for passenger convenience, including lounges, retail spaces, and dining options.
